

Haşim Yiğitgülsün

Frontend Developer

As a passionate and innovative frontend developer, my goal is to create modern web applications that maximize user experience. I have extensive experience with popular frontend technologies such as React, Next, Vue, and Angular.

In my career, I aim to contribute to companies' digital transformation processes by developing user-centric, high-performance, and scalable applications. As a professional who is always open to learning and self-improvement, my priority is to produce innovative solutions using technology efficiently.

Additionally, I aim to master the product and domain and advance the company with innovative ideas.

Education

2011-2015

Mehmet Şam Anatolian Vocational High School

Database Department

2015-2017

Yalova University

First in the Computer Programming Department with a GPA of 3.5/4.

2017-2021

Anadolu University

Management Information System

Language

English

- Reading : B1
- Writing : B1
- Speaking : A2

Experience

2022 - 2024

Huawei

Frontend Developer

Aspiegel

- The CMS project introducing Huawei services.
- Technologies used: **Vue and Angular**.
- [aspiegel.com](#)

UI Library

- The UI library project aimed for workplace usage.
- Technologies used: **Vue 3**.
- [Project Link](#) and [UseView Link](#).

EBG

- Provides news and similar bulletins to users in the Chinese region.
- Technologies used: **React, Redux, Nest.js**.

WeTeam

- The project we developed for effective project management processes in the workplace.
- Technologies used: **Next.js, React, Redux, Redux-Toolkit, and MongoDB**.

2019 - 2022

Anadolu Sigorta

Frontend Developer

Ada

- Developed by Anadolu Sigorta for Northern Cyprus.
- Offered and made ready for use 7 products within 1 and a half years: Compulsory Traffic Insurance, Comprehensive Motor Insurance, Border Gate Insurance, Private Health Insurance, Pet Insurance, Group Health Insurance, and International Travel Insurance.
- Approximately 50 agencies utilize these products.
- Team: one frontend developer, two backend developers, two business analysts, and two testers.
- Built the project from scratch, and I solely worked on the frontend development.
- Converted the project into a mobile application using webview in React Native.
- Technologies used: **JavaScript, jQuery, Vue.js, Firebase, and React Native**.

Asenta

- Data Analysis and Reporting Web Application for agency branches.
- Continued to provide support for the 'Ada Project' while working on this project.
- Technologies used: **React, Redux, and D3.js**.

Side Project

- Survey application developed for Anadolu Sigorta Ada team: [Form-App](#).
- Technologies used: **React, Redux, Firebase, Recoil, Tailwind CSS, and Chart.js**.

Professional Skills

Programming Languages

- JavaScript
- TypeScript
- C#

JavaScript Frameworks and Libraries

- React
- Next
- Angular
- Vue
- Redux
- Zustand
- RTK Query
- Recoil
- Node
- Express
- Nest
- D3
- Chart
- Tailwind

Database

- MsSQL
- PostgreSQL
- Prisma
- MongoDB
- Firebase

2018

EKİN Technology Industry And Trade A.C.

Technical Support

- Swiftly and effectively resolved users' software and hardware issues.
- Handled the installation and configuration of new software and hardware.
- Monitored and reported technical support requests.
- Communicated technical information clearly to users.
- Maintained a professional and helpful demeanor.

2017

ARGELA Software And Computer Technology Industry And Trade A.C.

Trainee

- During the mandatory 3-month summer internship at university, I gained comprehensive experience in Computer Programming.
- I practiced database management using fundamental query languages like SQL.
- Engaging in real-world projects, I enhanced my programming skills and learned industry-standard software development practices.
- Additionally, I acquired valuable experience in teamwork and project management.

2016 - 2017

Yalova University Information processing department.

Trainee

- During a 10-month part-time internship as a Technical Support intern, I gained valuable experience in troubleshooting and resolving technical issues.
- I assisted users with software and hardware problems, honing my skills in system maintenance and configuration.
- This internship provided me with practical knowledge in IT support practices and enhanced my problem-solving abilities in a professional environment.

2014 - 2015

ARGELA Software And Computer Technology Industry And Trade A.C.

Trainee

- During my 10-month internship as a high school student, I gained valuable experience in a Technical Support position.
- I actively participated in resolving software and hardware issues for users.
- Throughout this experience, I developed skills in providing customer support and solving fundamental IT issues.

Bootcamp

2018 - 2019

İstanbul Topkapı University

- I received a total of 800 hours of full-stack web development training over six months. Afterward, I found a job as a frontend developer.
- I learned the logic and sustainability of software development.
- I entered a period where I started asking "Why" and "For what reasons," and this has continued throughout my software career.

Projects
